Bid Log Quick Card

General Information

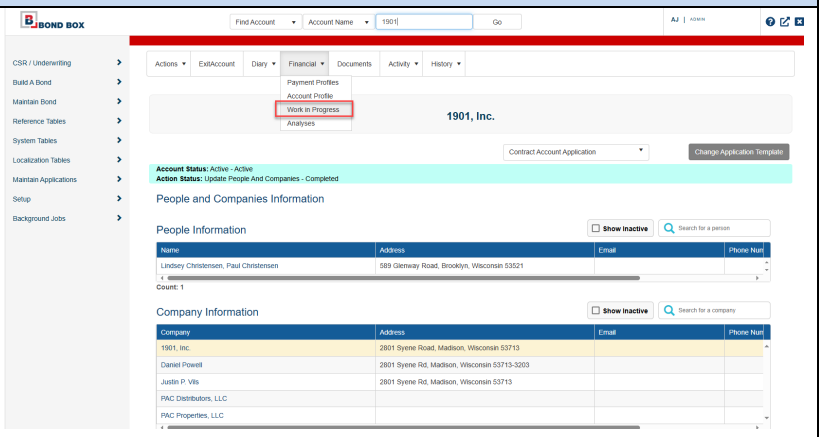
The Bid Log application provides the ability to enter and track bids for Bond Box Accounts. The Bid Log contains a list of bids and data associated with the bids. The information in the Bid Log is used to analyze the bid work for an account and track all information related to a specific account's efforts to bid on projects.

This quick card details how the Bid Log is incorporated into the Bond Box Application and the basic features of the Bid Log.

Bid Log

1.

To open the Bid Log Application from an Account in Bond Box – first click the 'Financial' dropdown on the top menu bar and select 'Work in Progress'.



2.

When the Work In Progress (WIP) Application opens in a new window or tab, next click on the link for 'Bid Log' on the left navigation.

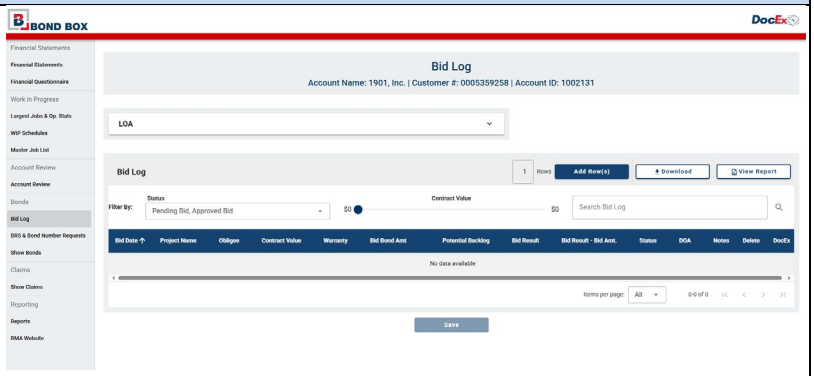
3.	

From the Bid Log Summary Page, several actions can be initiated:
• Add Row(s)
• Download
• View Report
• Filter By Status
• Contract Value Filter
• Search Bid Log
• Individual Bid Log Record Actions
  ○ Bid-Level Notes
  ○ Delete
  ○ DocEx Link
	


4.	
<u>LOA Grid:</u> In order to view LOA records for the account, click on the down arrow (located on the right hand side) to display the LOA grid. This grid is view only and displays all LOA records for the account that are 'Active/Approved' and this information is displayed from the LOA capture in the Account Review Application.	5.	
<u>Bid Log Grid:</u> The Bid Log is displayed in a grid format with columns representing values associated with a bid, some user-entered and some calculated. The columns in the grid are as follows: • Bid Date • Project Name • Obligee • Contract Value • Warranty • Bid Bond Amt ○ $/% • Potential Backlog • Bid Result • Bid Result – Bid Amt. • Status • DOA • Notes • Delete • DocEx Required fields are Bid Date and Project Name.	 Navigate through the Bid Log Grid fields by: - Using the tab key (moving right to left) or shift+tab keys (moving right to left) - Sliding the horizontal scroll bar to view all fields in the grid

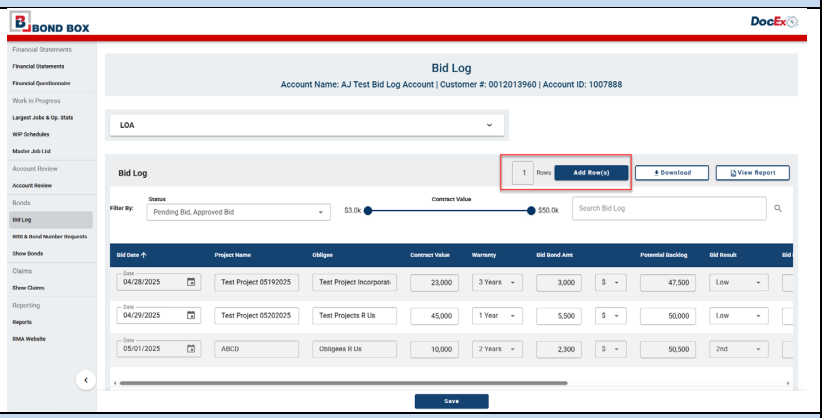
6.

Adding Bid Rows to the Bid Log Grid:

A new Bid row or rows can be added to the Bid Log by adding the number of rows that the user would like to add to the Bid Log in the 'Rows' entry field and then clicking the 'Add Row(s)' button. Once those actions are taken, the number of rows entered will be added to the bottom of Bid Log grid.



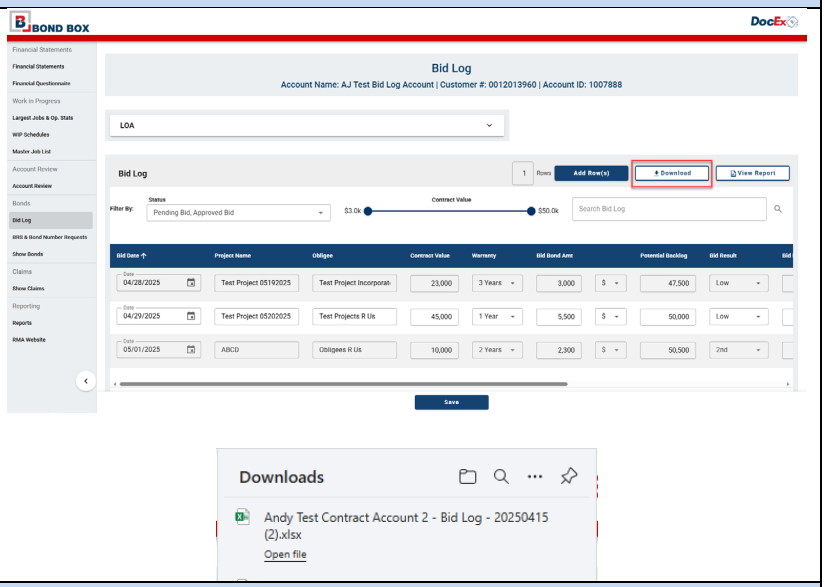
7.

Download Button:

An excel download of the contents in the Bid Log can be produced by clicking on the 'Download' button located in the upper right hand part of the page.

Once the 'Download' button is clicked a file download will occur in the browser.

Clicking on the 'Open file' link in the download will open the file in Excel.



8.

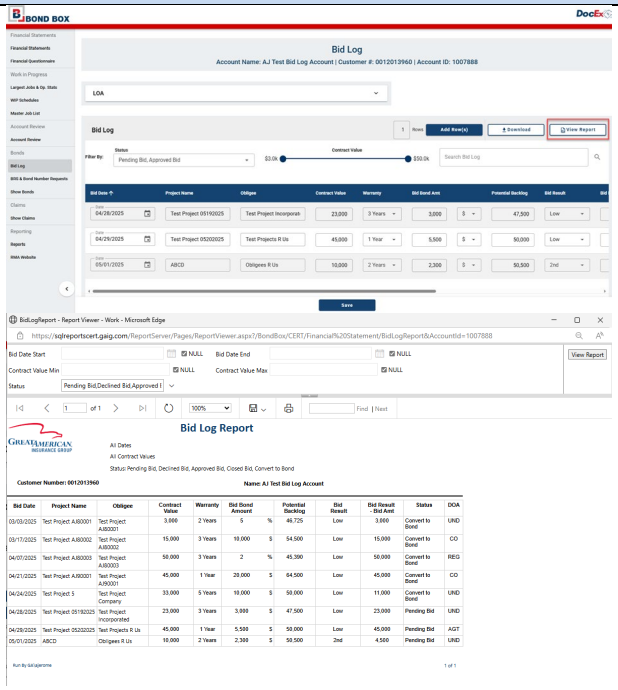
View Report:

Clicking on the 'View Report' button will launch the Bid Log Report in a new tab/window.

When the Bid Log Report launches it will by default display all of the bids for the account.

The following parameters are available to filter the results of the Bid Log Report:

- Bid Date (start and end – to define a range of Bid Dates)
- Contract Value (min and max – to define a range of Contract Values)
- Status (multi-select – defaulted to selection of all Statuses)



Classified as General

9.

<u>Filter By Status:</u>

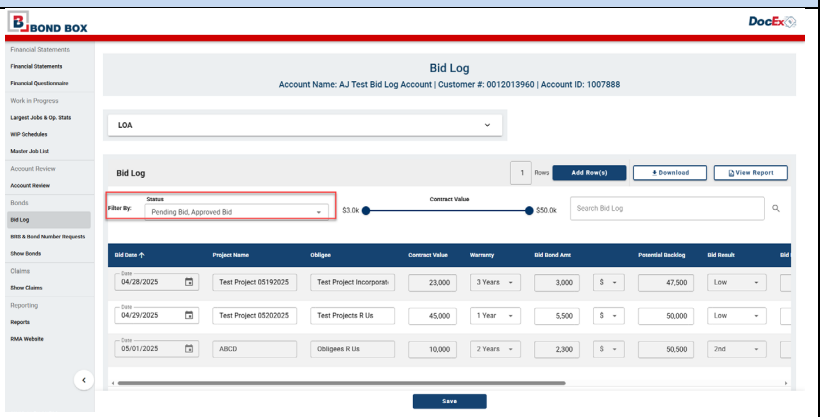
The Filter by Status function will allow a user to filter the list of bids by the Status type.

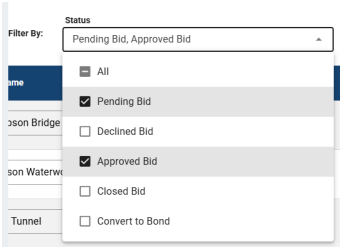
Statuses are:

- Pending Bid
- Declined Bid
- Approved Bid
- Closed Bid
- Convert to Bond

The default filter is to show only Pending Bid and Approved Bid.

The filter selection can be edited to select all or select individual Status types.

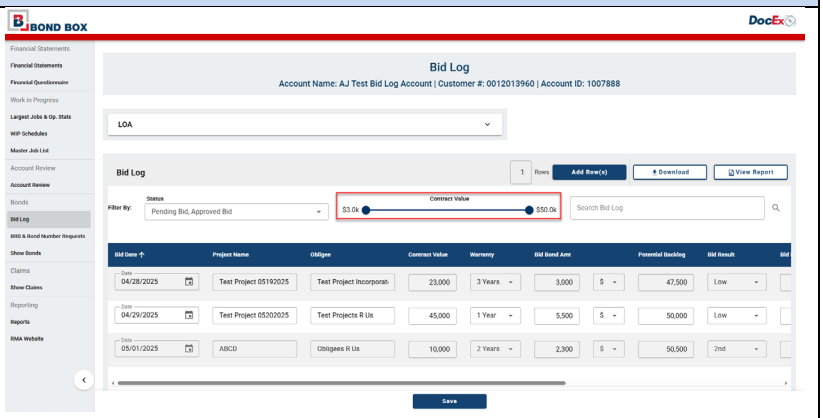




10.

<u>Filter by Contract Value:</u>

The Contract Value slider will filter the Bid Log data based on the low and high amounts that you select. You can click on the low point and slide it right or click on the high point and slide it left to change the Contract Value range that you would like to see in the Bid Log.



11.

<u>Search Bid Log</u>:

The Bid Log Search box will search for a string of characters entered across all fields in the Bid Log. The search results returned will be based on any matches made from what was entered in the search box and what is contained in the individual fields.

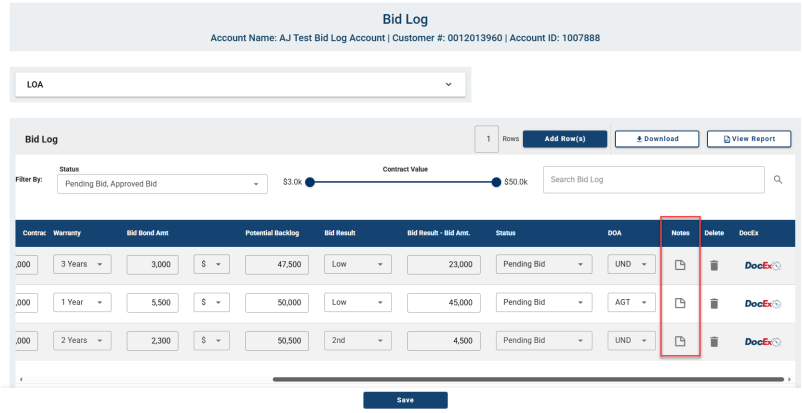
12.

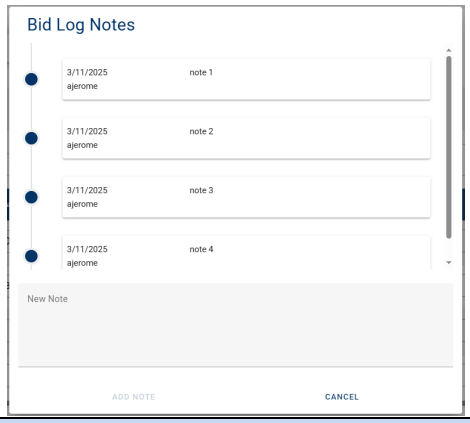
Bid-Level Notes:

A user can add a Bid-Level Note to any Bid in the Bid Log by clicking on the Notes Icon in that Bid row.

Once the Notes Icon has been clicked a 'Bid Log Notes' modal will display for a note to be entered.

If a specific Bid in the Bid Log has had multiple Notes entries saved – it will appear with an indicator in red denoting how many notes have been entered. In this scenario, when the Notes Icon is clicked – a history or timeline of the notes entered will display above the new note's entry box.





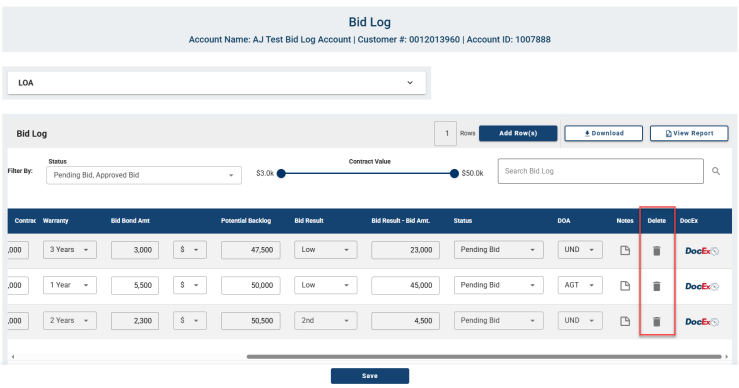
13.

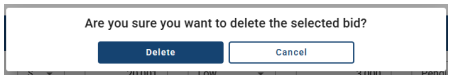
Deleting a Bid:

A Bid entry in the Bid Log can be deleted by clicking on the 'Delete' button (trashcan icon) for that Bid row.

Only Bids with a Status of 'Pending Bid' can be deleted.

When the 'Delete' button is clicked – a confirmation message will display to confirm the intention of deleting.





Classified as General

14.	
<u>Save</u>: Any changes to data in the Bid Log will result in the 'Save' button (located at the bottom of the Bid Log Page) becoming enabled. Clicking on the 'Save' button will commit the update to the database and a message will display once a successful save has been executed that says, 'Bid Log data has been saved.'	 15.	
<u>Linking to DocEx</u>: Any time that a 'Save' occurs on the Bid Log Page, a link is established or updated with DocEx for any new or updated Bids in the Bid Log. This connection or link is made and the DocEx case for the Bid can be opened by clicking on the 'DocEx' button for that Bid. Upon the clicking of the button – DocEx will open in a new browser window or tab and open to that Bid's case in DocEx.	 
Classified as General

16.	
Automatic Rules in the Bid Log: • Bid Date Expiry – When a Bid's Bid Date is more than 120 days old – the Status will be automatically updated to 'Closed Bid'. • When a Bid's Status = 'Closed Bid' or 'Convert to Bond', the Status cannot be updated to a different Status.	• When a new Bid is added to the Bid Log that Bid's 'Potential Backlog' field will be populated with the Total WOH value from the most recent balanced WIP Schedule. • If a user adds a value in the Contract Value field the following calculation will occur to determine an auto-populated 'Potential Backlog' value: ['Contract Value' value that the user entered + 'WOH' value from the most recent balanced WIP Schedule for the account] = Updated 'Potential Backlog' value • If a user decides to overwrite the Potential Backlog field value manually – then the auto-population and auto-calculation for this field for this bid ceases.
17.	
Changing a Bid's Status to 'Approved Bid': When a Bid's Status is changed to 'Approved Bid', an Approved Bid modal will be displayed to capture data for that Status change.	18.	
Changing a Bid's Status to 'Convert to Bond': When a Bid's Status is changed to 'Convert to Bond', a Convert Bid to Bond modal will be displayed to capture data for that Status change.	
Classified as General

19.	
Once a Bond Number has been entered for a Bid and saved to the database, a backend process will run nightly to check to see if the same bond number has been purchased in BondBox. Once the same Bond Number has been purchased in BondBox and the nightly process identifies that a Bid with 'Convert to Bond' status has the same bond number as a purchased bond in BondBox, then another backend process will be run to move any of the documents from the bid case in DocEx to the bond case in DocEx. In addition, the Bid Log will be updated for that bid to have the DocEx link point towards the bond case (instead of pointing to the bid case).
