WIP Application Quick Card

General Information

The Work in Progress (WIP) Application provides the ability to create, view, and edit WIP Schedule information for Bond Box Accounts. WIP Schedules contain a list of jobs and financial data associated with the jobs. The information in the WIP Schedule is used to analyze the work that has been completed and that is in progress for a given Account.

In addition, a Master Job List page displays all jobs for an account, including jobs entered on a WIP Schedule and bonded jobs originating in Bond Box.

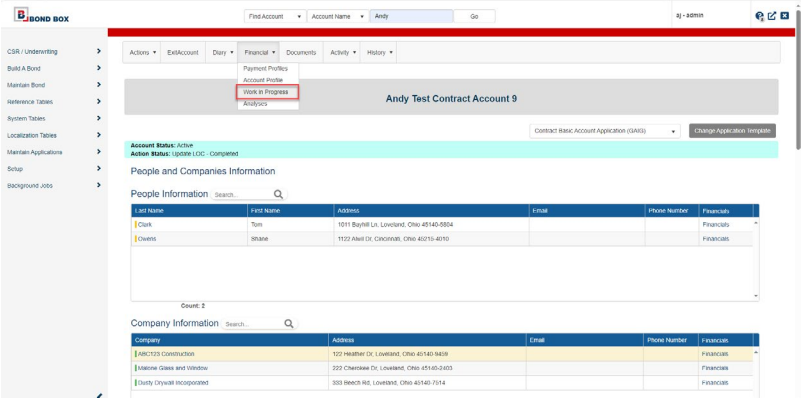
Finally, a Largest Jobs and Operational Statistics page summarizes data from WIP Schedules and from Bond Box to provide additional analytics concerning an Account's workload and job-related data.

This quick card details how the WIP Application is incorporated into the Bond Box Application and the basic features of the WIP Application.

Work in Progress (WIP)

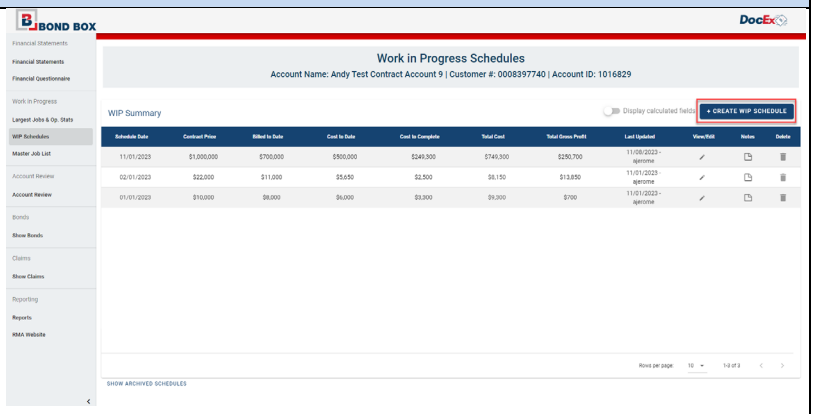
1.

To open the WIP Application from an Account in Bond Box – click the 'Financial' dropdown on the top menu bar and select 'Work in Progress'.



2.

When the WIP Summary page loads, a list of WIP Schedules will display, if WIP Schedules exist, for the Account.



Classified as General

3.	
From the WIP Summary page, information about the WIP Schedules is presented. In addition, there are several actions that can be initiated from this page: • Display Calculated Fields – To show or hide additional calculated WIP Schedule total fields • View/Edit – to view or edit the details of a WIP Schedule • Notes – to enter notes at a Schedule-level • Delete – to delete a WIP Schedule • Show Archived Schedules – to display a list of WIP Schedules that are more than 5 years old	4.	
To create a new WIP Schedule, click the 'Create WIP Schedule' button. A 'New WIP Schedule' modal will be presented. Fill in values for the fields in the modal and click the 'Create' button to finish the creation of the WIP Schedule. The values entered here will be used to help determine if the WIP Schedule is balanced or not by checking these values against the totals entered in the WIP Schedule. Total Contract Price, Total Billed to Date, and Total Cost to Date are required fields. After the WIP Schedule has been created, the WIP Schedule Entry page will be displayed.	5.	
After finishing the creation of a new WIP Schedule or by clicking the 'View/Edit' button for a WIP Schedule listed on the WIP Summary page, the WIP Schedule Entry page is presented. On this page a list of jobs is displayed with the ability to add jobs and update values for the jobs. In addition, there are several actions that can be initiated from this page: • Turning off/on Sortable Columns – the default sort is on the 'Sort' column and the user can label each row with a desired order to sort by (incrementing by 10).	
Classified as General

Turning off the 'Sortable Columns' toggle will turn off the sorting, if desired.

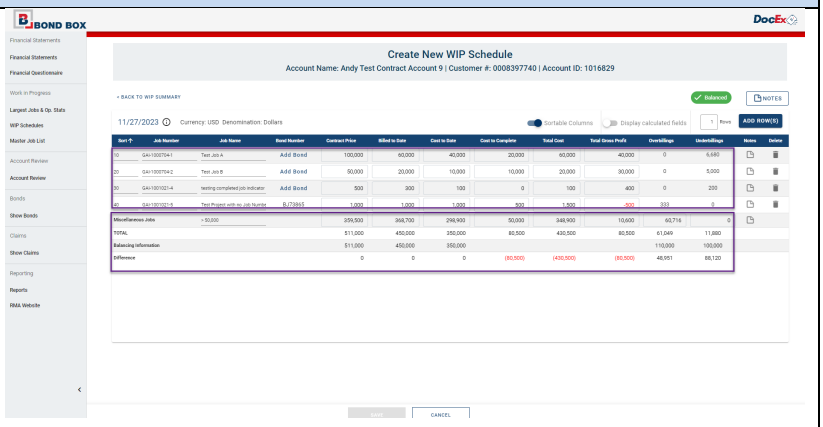
- Display Calculated Fields – to show or hide additional calculated fields for a job on a WIP Schedule
- Schedule-Level Notes
- Job-Level Notes
- Delete – to delete a job from the Schedule

6.

The WIP Schedule is displayed in a grid format with columns representing values associated with a job, some user-entered and some calculated.

The rows in the grid are as follows:

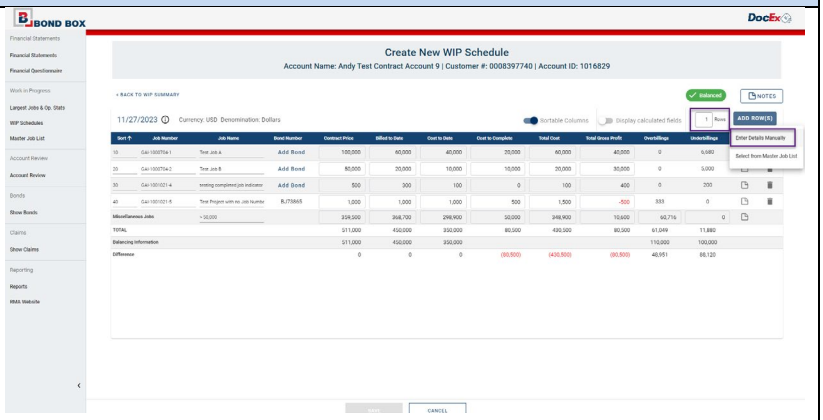
- Individual Job rows (as shown in the example as rows 10 through 80) are for individual jobs that are being tracked on the schedule.
- Miscellaneous Jobs row – this tracks all miscellaneous jobs and their values together (jobs that are not tracked individually)
- Total row – this tracks the totals for each column summing the values for all Individual Jobs and the Miscellaneous Jobs row.
- Balancing Information row – these values are populated from what was entered on the New WIP Schedule modal at the time the WIP Schedule was created.
- Difference row – calculates the difference between the values in the Total Row and the Balancing Information row and helps to determine when a WIP Schedule is balanced or not.



7.

<u>Adding Job Rows to the WIP Schedule:</u>

Job rows can be added to the WIP Schedule by adding the number of rows that the user would like to add to the WIP Schedule in the 'Rows' entry field and then clicking the 'Add Row(s)' button and selecting the first option, 'Enter Details Manually'. Once those actions are taken, the number of rows entered will be added to the bottom of the list of jobs and just above the Miscellaneous Jobs row.



Classified as General

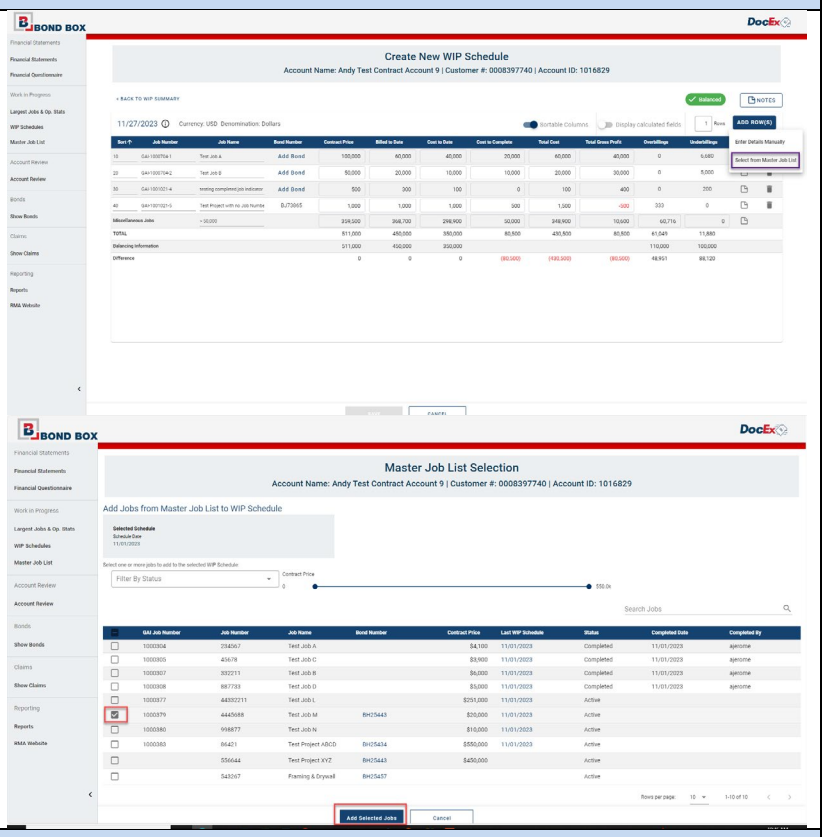
8.

<u>Selecting a Job from the Master Job List:</u>

A Job can be added to the WIP Schedule from the Master Job List by clicking the 'Add Row(s)' button and selecting the second option, 'Select from Master Job List'.

A list of jobs on the Master Job List will display and one of those jobs can be brought into the WIP Schedule by clicking the checkmark in the column that is furthest to the left for the job that needs to be added to the WIP Schedule. Then click the 'Add Selected Jobs' button to bring the job into the WIP Schedule.

Note: Any bonded jobs from WIP Schedules that have been migrated from BondBuilder (BB3) will not show in the Master Job List at this time.



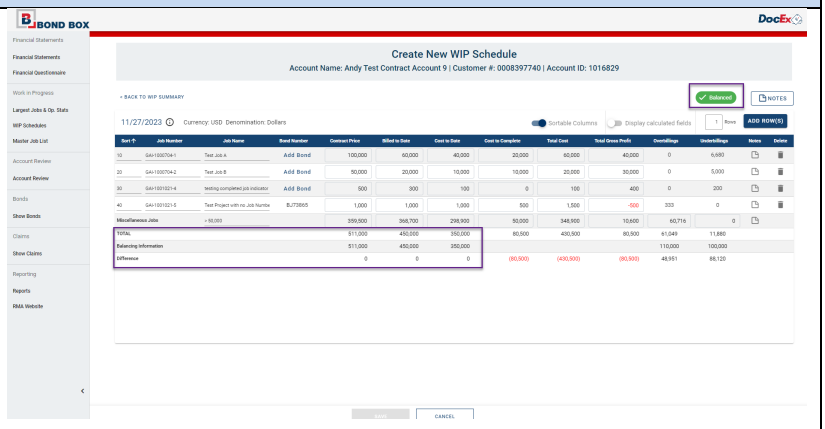
9.

<u>Balanced Indicator:</u>

A WIP Schedule Balanced Indicator displays at the top right of the page and displays as green 'Balanced' or red 'Not Balanced'.

If there is no difference between the Total row and Balancing Information Row values (set when the schedule was created) the schedule is balanced.

Fields that determine whether a WIP Schedule is balanced:
Contract Price
Billed to Date
Cost to Date



10.

<u>Editing Initial WIP Schedule Data</u>:

If a user would like to edit the data that was entered about the WIP Schedule when the schedule was created, this can be accomplished by clicking on the ⓘ icon next to the WIP Schedule Date.

A 'WIP Schedule Properties' modal will display and the fields can be updated by clicking the 'Update' button in the modal.

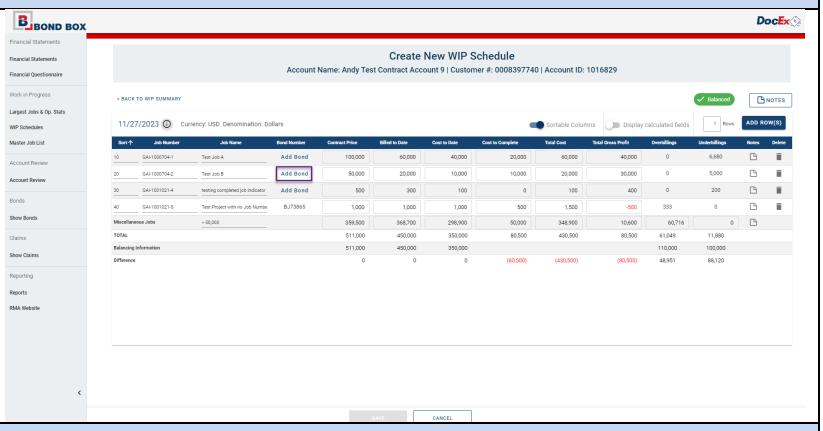
11.

<u>Associating a Bond to a Job on a WIP Schedule</u>: To associate a bond to a job, click the 'Add Bond' link found in the Bond Number column in the WIP Schedule grid. If a bond has already been associated to a job, that bond number will be displayed as a link in this column.

Clicking this link will open up the Bond-Job Association page.

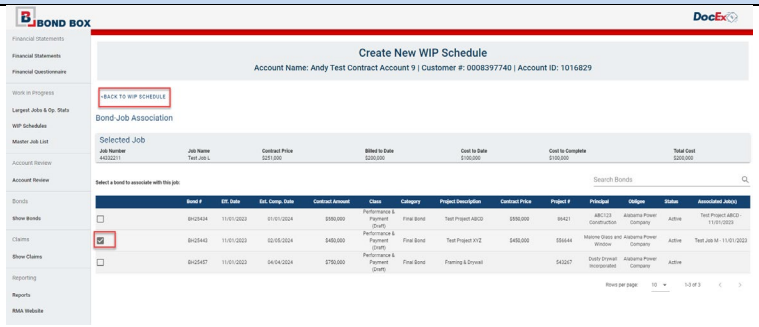


12.

<u>Associating a Bond to a Job on a WIP Schedule</u>: The Bond-Job Association page displays information about the selected job on the WIP Schedule and a list of bonds from Bond Box and allows for the selection a bond by clicking the checkbox in the left most column of the grid.

Once a selection is made, the user can click the 'Back to WIP Schedule' button and the bond number will now display for that job.

Note: Any bonded jobs from WIP Schedules that have been migrated from BondBuilder (BB3) will not show in the Bond-Job Association Page at this time.



13.

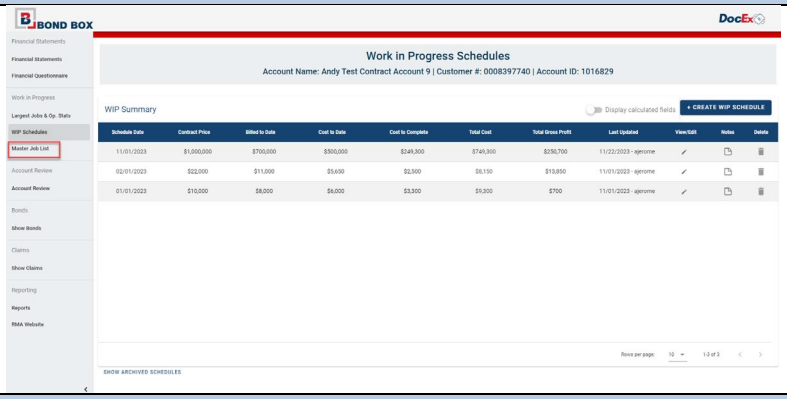
Master Job List

1.

To access the Master Job List from the WIP Summary page, click the 'Master Job List' link in the lefthand navigation panel.



2.

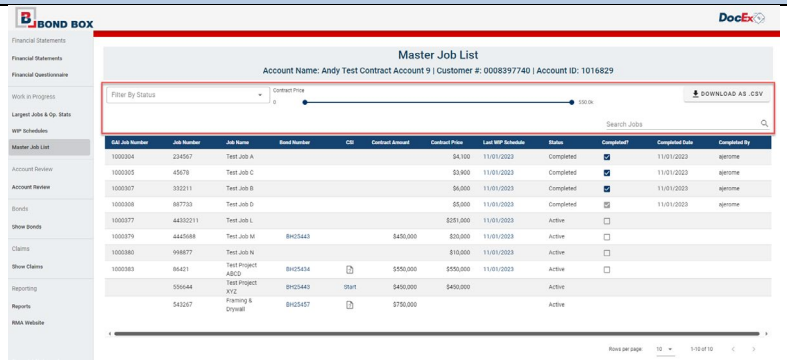
The Master Job List page displays a combined list of:

- All jobs that appear on WIP Schedules for the Account
- All bonded jobs in Bond Box that are not yet on a WIP Schedule for the Account.

Note: Any bonded jobs from WIP Schedules that have been migrated from BondBuilder (BB3) will not show in the Master Job List at this time.

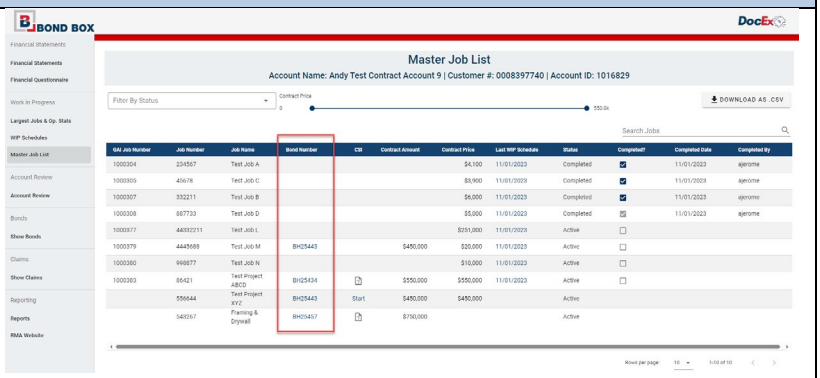
At the top of the Master Job List page the following functions exist:

- Filter the list of jobs by Status
- Filter the list of jobs by Contract Price
- Download the list of jobs to a .CSV file
- Search



3.

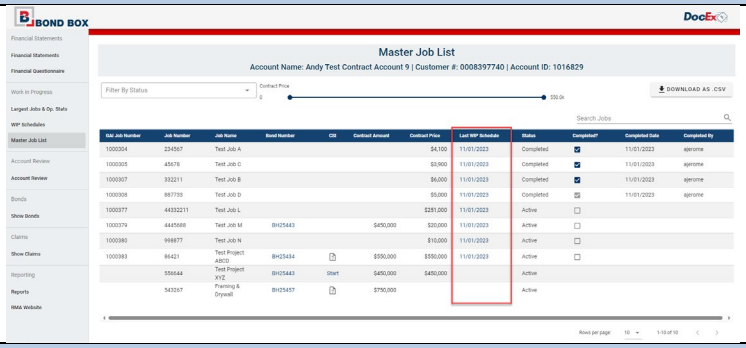
The Master Job List page displays a Bond Number if the job is a bonded job or if the job has been associated to a bond number. The bond number appears as a link and clicking on the link will display the bond details page in Bond Box in a new browser tab.



Classified as General

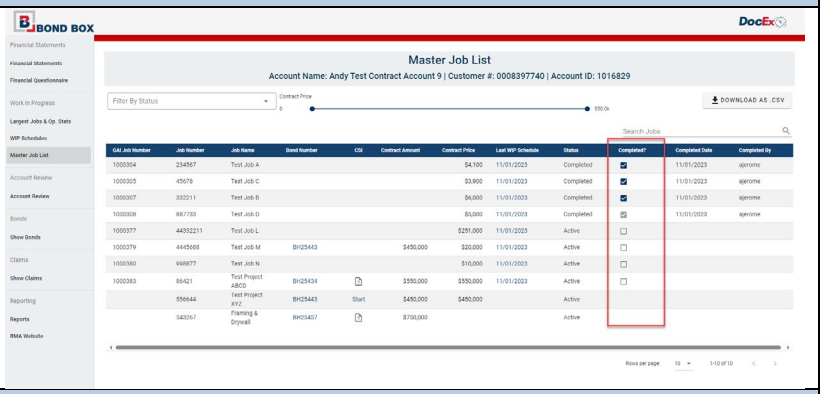
4.

The Master Job List page displays the Last WIP Schedule Date the job appeared on if the job is part of a WIP Schedule. The last WIP Schedule Date appears as a link and clicking on the link will display the WIP Schedule in a new browser tab.



5.

The Master Job List page displays a 'Completed?' column that allows for a job to be manually marked completed or not completed by clicking on the checkbox for that job. Jobs that have already reached 100% complete on a WIP Schedule have that function disabled. Jobs that do not appear on a WIP Schedule do not have the completion checkbox function displayed.

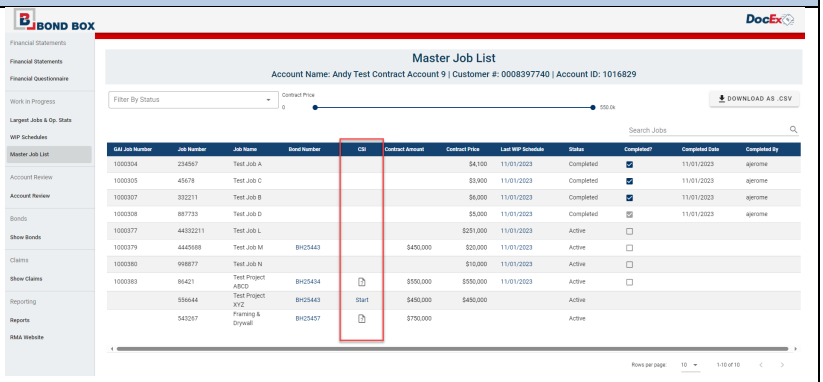


6.

The Master Job List page displays a 'CSI' column to track and edit Contract Status Inquiries on bonded jobs. The following icons are displayed for CSI functionality:

	Displays when a bonded contract job's contract price is over $500,000 (automatic CSI record) or when a bonded contract job has a CSI record manually initiated.
Start	Displays when a bonded contract job's contract price is under $500,000 and clicking the 'Start' icon will manually initiate the Contract Status Inquiry
	Displays when the Contract Status Inquiry has been closed.

Note: CSI records from BondBuilder (BB3) have not yet been migrated to BondBox and will not show in the Master Job List at this time.



Classified as General

7.	
If a user clicks the CSI 'Edit' icon or the 'Start' icon, the Contract Status Inquiry page will open. When a CSI record is created (automatically or manually) the Next Inquiry Send Date is set 6 months out and additional fields are pre-populated from values in Bond Box for that bonded job. Edits can be made to the CSI record on this page and then Saved via the 'Save' button. The Inquiry can be closed via the 'Close Inquiry' button. Notes can be added via the 'Notes' button. The history of the CSI record can be viewed via the 'View Inquiry History' button. If the CSI record remains open it will follow the existing process and Contract Status Inquiry letters will be automatically sent out on the Next Inquiry Send Date and then every 3 months after that.	
Largest Jobs & Operational Statistics

1.	
To access the Largest Jobs and Operational Statistics page from the WIP Summary page, click the 'Largest Jobs & Op. Stats' link in the lefthand navigation panel.	
2.	
The Largest Jobs & Operational Statistics page displays a 'Largest Completed Jobs/Past Job History section at the top of the page that presents up to 10 of the largest completed jobs (by highest contract price) for the account consisting of: • Completed Jobs that exist on a WIP Schedule • Manually added jobs Jobs can be added manually using the 'Add Job' button. The grid displays jobs 1-5 on the first page and jobs 6-10 on a second page, if necessary. The display can be altered by using the arrow buttons at the bottom of the grid.	

Classified as General

3.	
The Largest Jobs & Operational Statistics page displays an 'Operational Statistics' section below the 'Largest Completed Jobs/Past Job History' section. This section displays the following: • Current Work on Hand fields – (displays information from the most recent balanced WIP Schedule) • Largest Work on Hand Past fields – (displays information from any past balanced WIP Schedules or it is user-entered if only one balanced WIP Schedule exists) • Largest Next Year – (displays user-entered fields) • Actual Bid/Final Bond Support Level Basis – (displays user-entered fields)	4.	
Make sure to Save any updates made to any values on the Largest Jobs & Operational Statistics page by clicking the 'Save' button on the bottom of the page.
